Bama Charan Chhandogi

+91-6295474539 — b.c.chhandogi@gmail.com — GitHub — LinkedIn — Portfolio

Skills

- **Python:** Core Python, OOP, REST APIs, FastAPI, Pydantic, SQLAlchemy (async), Alembic
- **AI/ML:** scikit-learn, feature engineering, model evaluation, Generative AI, LLM integration (OpenAI/Gemini APIs, LangChain), local model inference (Llama via Ollama), Model Context Protocol (MCP)
- **Background Processing:** Celery, APScheduler, Redis
- **Databases:** PostgreSQL, pgvector, MySQL, MongoDB, DynamoDB, Redis
- **Backend & Infra:** Node.js, Express.js, Docker, AWS Lambda, Linux, Git, GitHub, CI/CD (GitHub Actions)
- **Testing & Reliability:** Jest, Sentry
- **Additional:** JavaScript, TypeScript, React.js

Experience

- **ClipWise** – Full Stack Engineer — Sep 2025 – Present
  clipwise.ai
  - Own the reliability and scale of ClipWise's AI video generation and billing platform, powering **500+ automated videos/month** across **Instagram, TikTok, and YouTube**.
  - Built an internal **Model Context Protocol (MCP)** tool for AI-assisted content workflows, **cutting format development time by ∼70%**.
  - Integrated **third-party APIs** (Shopify, GoHighLevel) with **OAuth and webhook handling**, adopted by **100+ merchants and agencies**.
  - Used **Sentry** to catch and debug a spike in failed video-generation requests in production, diagnosing the root cause and shipping a fix.
  - Wrote **unit tests** for backend endpoints to catch regressions before deployment.
- **Ikarus 3D** – Software Developer Associate — Mar 2025 – Aug 2025
  ikarus3d.com
  - Built a **serverless backend** (AWS Lambda, API Gateway, DynamoDB) handling **1k+ API requests/day** at ∼400ms latency.
  - Set up **CI/CD pipelines using GitHub Actions** to automate builds and deployments.
- **GirlScript Summer of Code** – Project Admin & Mentor — May 2024 – Aug 2024
  gssoc.girlscript.tech
  - Improved **ML model accuracy by 15%** through feature optimization using **Python and scikit-learn**.
  - Developed a **React dashboard** for model performance tracking and data preprocessing.
  - Mentored **30+ contributors** and reviewed **60+ pull requests**, maintaining code quality across the project.

Projects

- **Local LLM Discord Bot** *Python, Ollama (Llama), Discord API, Gemini API*
  - Built a multi-purpose Discord bot in **Python** that runs **Llama locally via Ollama** to answer questions and summarize PDFs.
  - Implemented **fallback logic to the Gemini API** when the local model failed to respond, keeping the bot reliably available.
- **Engram** — Live Demo
  Next.js, TypeScript, PostgreSQL, Drizzle ORM
  - Engineered a **resilient multi-model AI engine** with automated failover across Gemini and Claude, using deterministic fallback logic to eliminate downtime from upstream rate limits.
  - Built a full-stack platform with **PostgreSQL**, Drizzle ORM, and GitHub OAuth for personalized active-recall quizzes.

Education

- **Chitkara University** — 2022 – 2026
  Bachelor of Engineering, Computer Science – Punjab, India – CGPA: 8.48

Achievements

- 3000+ developers actively using open-source developer tools (VS Code extensions and npm packages).
- Best Full Stack Project Award – Chitkara University (2024).
- Ranked Top 10 in Innogeeks Open Source Program.
